Presentation Objectives

- Impact of case management/care coordination in improving health
- Impact of case management/care coordination on improved birth outcomes
- Implications for future research/evaluation

Highlights

Topic 1

- Prenatal enrollees were less likely than interconception enrollees to have a preterm birth and low birth weight infant

Topic 2

- Improved outcomes for post-partum visits, well-woman visits, medical home, and breast feeding initiation

Resources

- Healthy Babies Brochure
- Infant Mortality Statistics Infographic
