Georgiana Wilton, PhD  
Senior Scientist  
University of Wisconsin-Madison School of Medicine and Public Health  
Department of Family Medicine and Community Health  
1100 Delaplaine Court  
Madison, WI 53705  
(608) 261-1419  
georgiana.wilton@fammed.wisc.edu

## Presentation Objectives

- To increase knowledge and awareness about the adverse effects of drug use during pregnancy
- To identify successful approaches to preventing prenatal substance abuse
- To review research results of prevention activities

## Highlights (including quotes, charts, graphs)

### Topic 1

- Drug use during pregnancy is not a straightforward topic; we must also consider other environmental effects as well as genetics.

### Topic 2

- There are many ways to prevent alcohol-exposed pregnancies
