96 Healthy Start Programs

- Accessed Part 1 of the course
February 27, 2017 - February 26, 2018

“Thank you for providing this helpful training to reinforce, reiterate, and remind us of our mission, purpose, and vision as advocates for the Healthy Start program.”

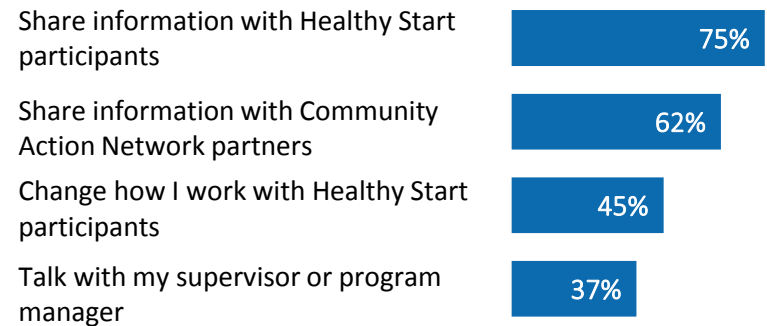

– Course Participant

HEALTHY START COMMUNITY HEALTH WORKER COURSE

Year 1 Evaluation Findings | February 27, 2017 – February 26, 2018

- 842** Healthy Start staff accessed Part 1 representing 96 Healthy Start Programs.
- 616** Healthy Start staff completed all five Part 1 modules.
- 321** Healthy Start CHWs completed all five Part 1 modules.
- 375** Post-module evaluations were completed for Healthy Start 101 (161), Preconception & Interconception Health (65), Prenatal Health (49), Postpartum Health (47), Parenting & Child Development (53)

How Respondents (n=330) Intend to Apply Course Material

What Course Participants are Saying

“These modules were not only a refresher, but a purposeful need for any CHW. Being able to learn at your own pace and then being able to share and apply what you have learned is a benefit to me.”

“I can not believe how much I have learned. This information will be so helpful as I continue to work with parents.”

“I recommend this course for everyone in general to gain understanding and knowledge about Healthy Start Programs across the US.”

100% Of respondents (n=333) were confident they could implement all 22 competency-based objectives across the five modules. Most were VERY confident.

99% Of respondents (n=330) agreed the course was relevant and the information was understandable. Most noted the course would help with job performance.

85% Of respondents (n=333) completed and found useful the offline activities. When asked for suggested improvements, 5% of respondents would have liked more offline activities.
