

This document captures answers to the questions asked during the July 14, 2020 *Fatherhood Talk Tuesday* webinar. This webinar featured a presentation by staff from the Indiana Rural Health Association (IRHA) Healthy Start project.

Q: What was the breakdown of those fathers who were enrolled in the Indiana Rural Health Organization Healthy Start project based on the three groups you noted being served (Amish, Hispanic, Haitian)?

A: Amish – Unfortunately we have not yet added a variable to indicate if a participant is Amish, since it is not race/ethnicity.

Haitian – With the change of the new forms, it is not indicated if a participant is Haitian or if they speak Haitian Creole.

Hispanic - 24% of our male participants are Hispanic.

Q: Do you have to be trained for Fathering in 15?

A: No specific training, but staff completed modules themselves. The content is all online. The care provider provides the link to the training, then reviews results once a father has completed the course. Visit <https://store.fatherhood.org/fathering-in-15-online-learning-for-dads/> for more information about Fathering in 15.

Q: Is there a cost associated with Fathering in 15?

A: Visit <https://store.fatherhood.org/fathering-in-15-online-learning-for-dads/> for pricing.

Q: Can Fathering in 15 be self-taught through the app/text that you discussed?

A: Visit <https://store.fatherhood.org/fathering-in-15-online-learning-for-dads/> for more information about Fathering in 15.

Q: Following completions of the Fathering in 15, how do you keep dads engaged throughout the 18 months?

A: IRHA just introduced this program in May, so they are still determining how to keep dads engaged.

Q: Can you provide the link to the Spanish version of Fathering in 15?

A: Visit <https://store.fatherhood.org/fathering-in-15-online-learning-for-dads/> for more information about the curriculum.
