

CAREWare for Healthy Start User Guide

HSMED-II Validator

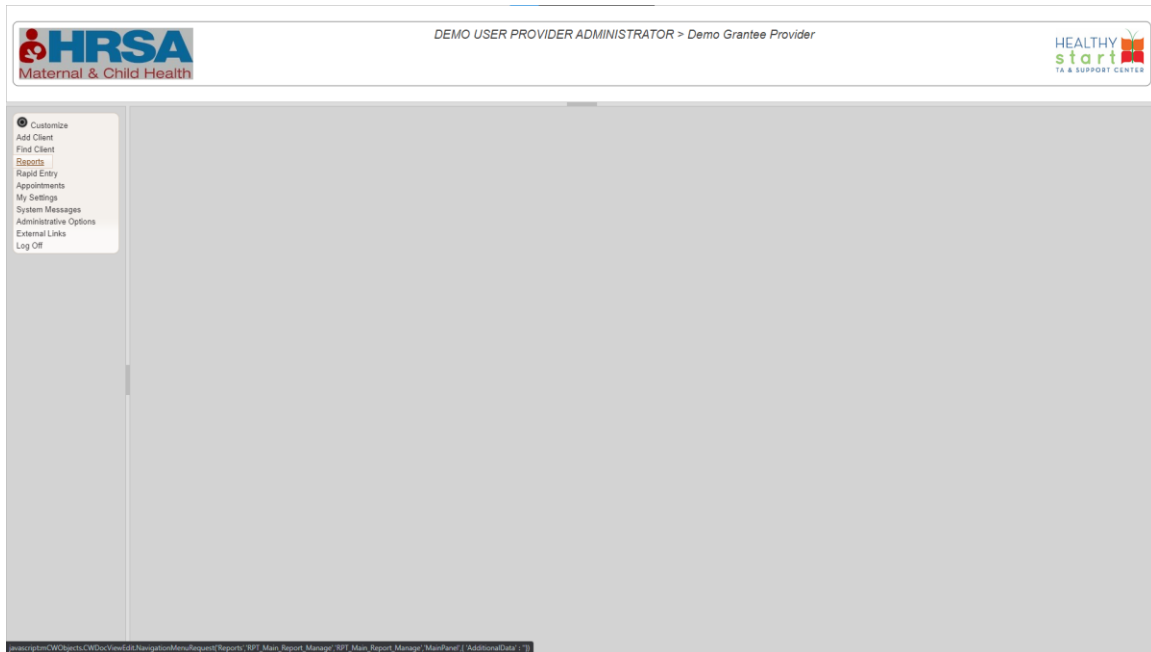

The HSMED-II Validator allows grantees to check for and correct validation issues in the HSMED-II Reports generated by CAREWare before submitting them to HSMED-II via the Electronic Handbook (EHB). It identifies any issues in the HSMED-II Reports, indicates the level of severity (i.e., Alert, Warning, or Error), and lists the affected clients.

How to access the HSMED-II Validator

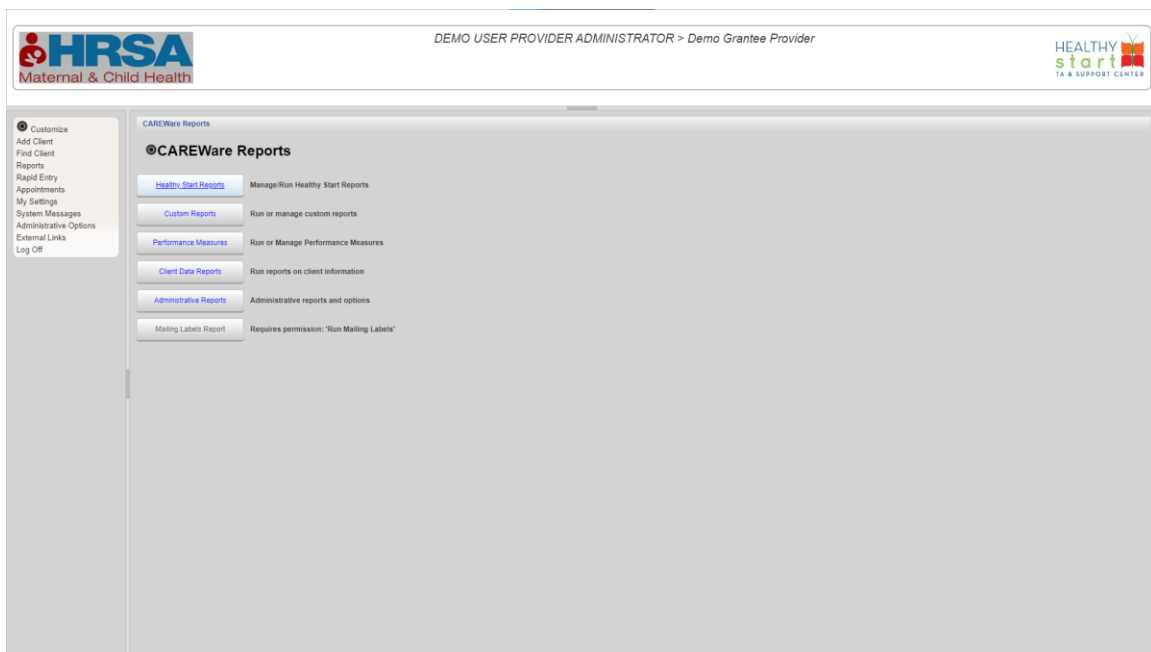

1. Log into CAREWare at <https://healthystart.jprog.net/careware/rs/index.htm>

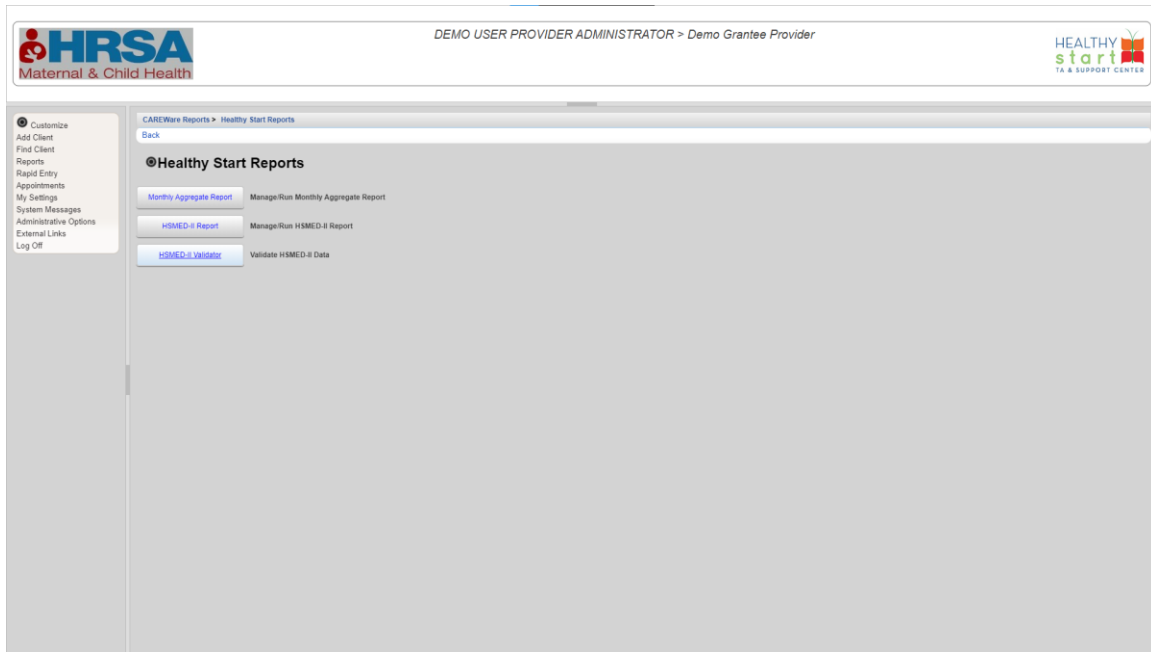

2. Click on Reports in the left navigation menu

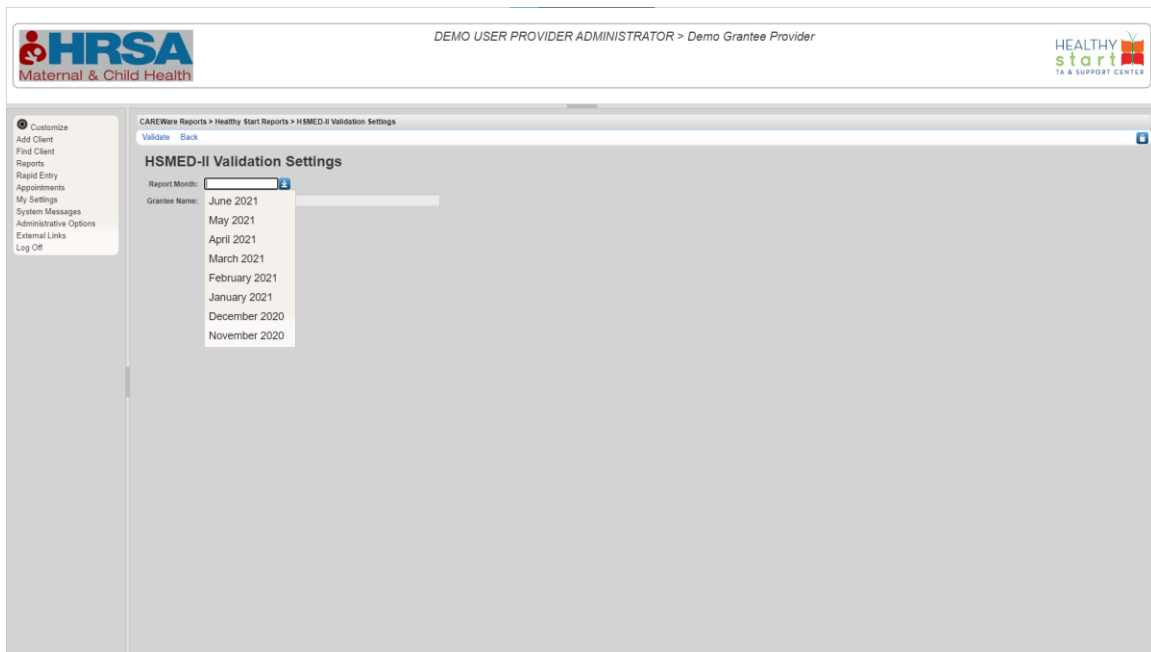

3. Click on Healthy Start Reports

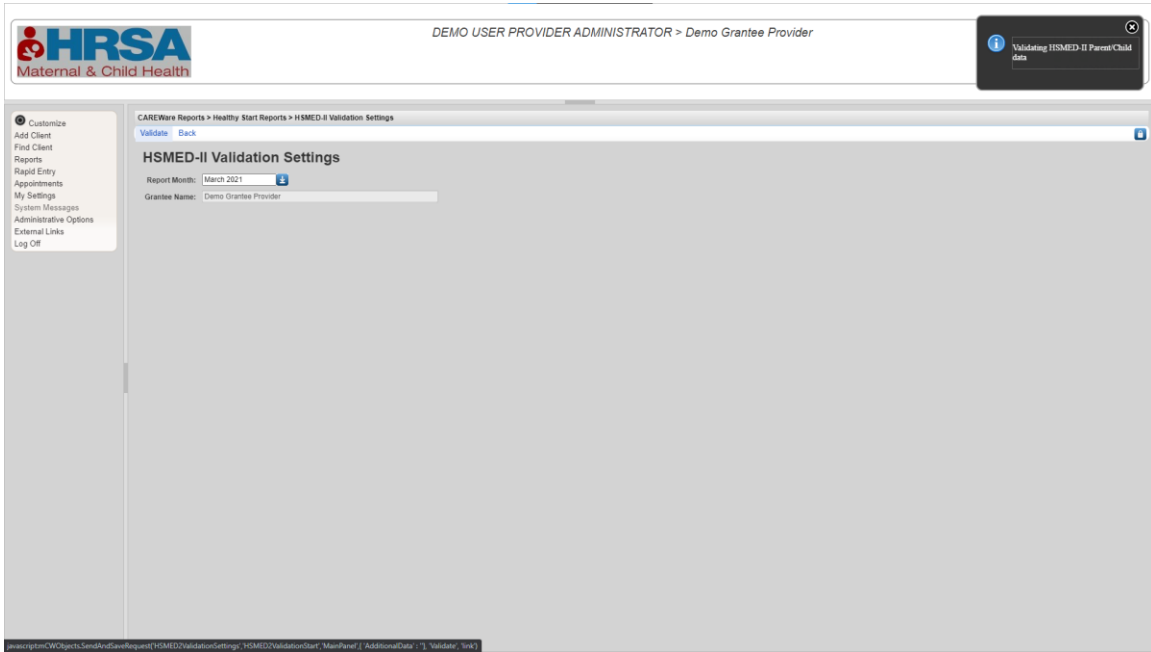

4. Click on HSMED-II Validator

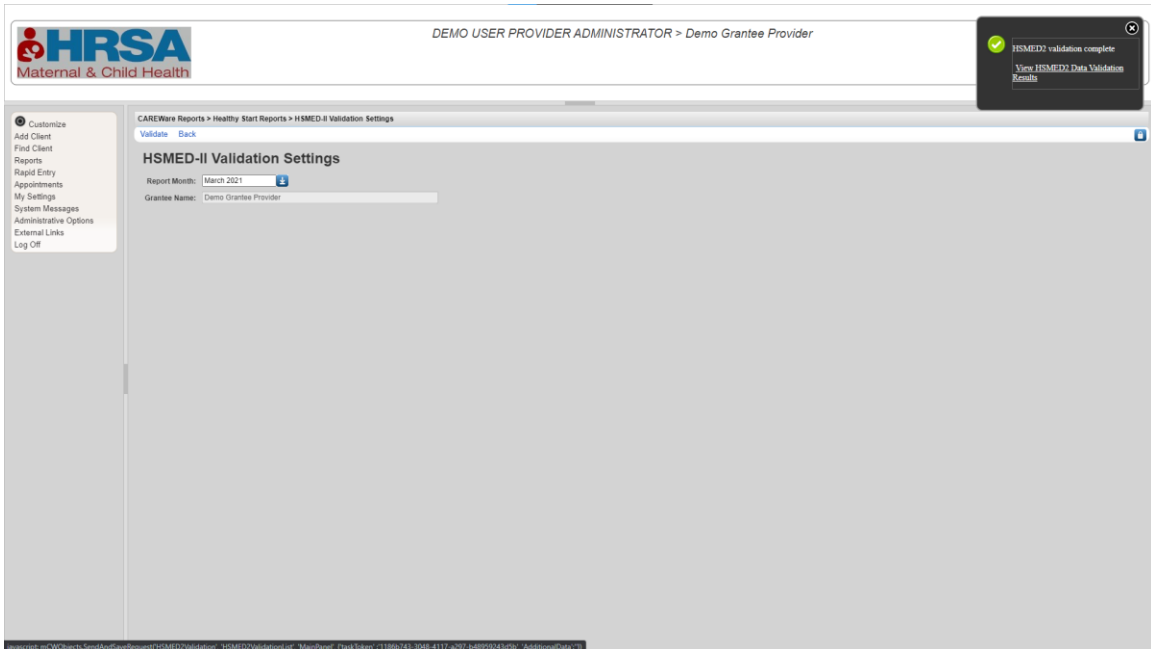

5. Select the monthly HSMED-II Report you'd like to validate and click "Validate"

6. A black pop-up will appear in the top left corner when CAREWare is validating the selected report

7. A second black pop-up will appear when the validation is complete. Click on "View HSMED2 Data Validation Results".

- If there are issues, they will be listed in a new tab, along with the number of affected clients and level of severity.

- Select the affected client and double click or click on "View Client Form Data" to go into the client record and make the corrections needed.

The screenshot displays the 'HSMED2 Validation Results' page. At the top, there are logos for HRSA Maternal & Child Health and HEALTHY start TA & SUPPORT CENTER. The breadcrumb trail reads: CAREWare Reports > Healthy Start Reports > HSMED-II Validation Settings > HSMED2 Validation Results. Below the breadcrumb, there are links for 'View Affected Clients', 'Back', and 'Print or Export'. A search bar is present above a table of validation results.
