Land Acknowledgment

We are gathered here today on the ancestral homeland of Massachusett, Pawtucket, and Naumkeag peoples.

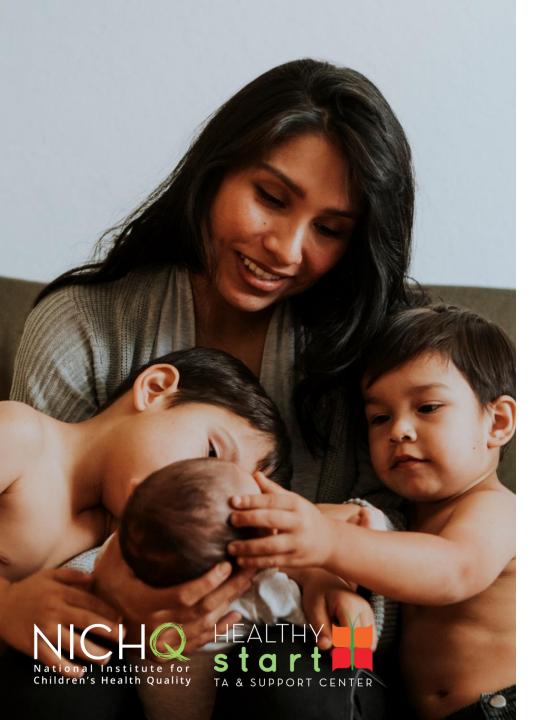

Visit native-land.ca

We invite you to visit this website now to find out on whose land you occupy. We acknowledge that all of us stand upon the homelands of Indigenous peoples who were forcibly displaced by European colonization. This acknowledgment, however, is insufficient without our reckoning with the reality that America has benefited from these Native peoples' displacement. The acknowledgement is empty without our efforts to counter the effects of structures that enabled—and that still perpetuate—injustice against Indigenous Americans. Let's all come into this space, honoring the ancestors and cherishing the generations among us. Thank you.

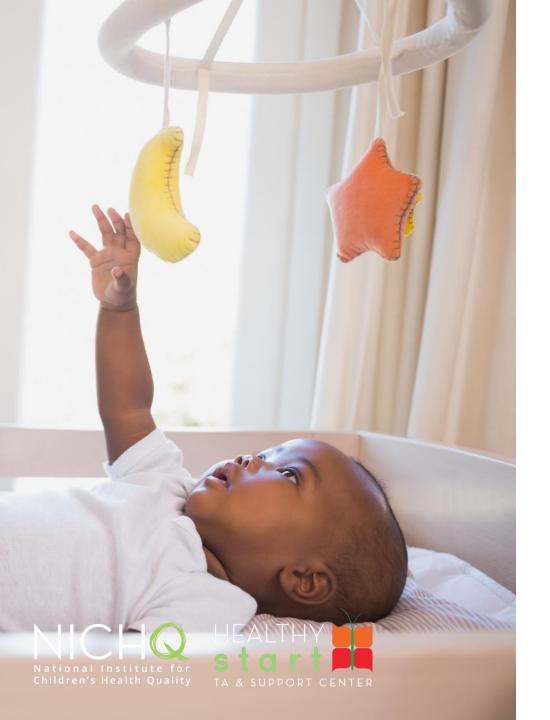

Welcome!

Please feel free to:

- View the agenda in the folder inside your tote bag.
- Review the nearby lunch options in your folder and place an order for delivery or pickup in advance.
- Write your thoughts on our Gratitude Board in the hallway.
- Take a photo with the photographer!

Please also note:

- The bathrooms are located outside the ballroom to the left.
- We will have the following breaks:
 - Quick break from 11-11:15 am
 - Lunch break from 12:45-1:45 pm
 - Quick break from 3:30-3:45 pm
- Coffee and tea will be available in the hall during the quick breaks.
- The TASC team is here to provide support or answer any questions during the meeting.

You'll notice stars on your name tags....

33 Years!

What is Boston Healthy Start Initiative?

The Boston Healthy Start Initiative has been part of a national initiative to reduce racial inequities in infant mortality and poor birth outcomes for the past 30 years. BHSI provides direct support to pregnant and parenting women, men, children and families through care coordination, connection to resources, health education, and advocacy.

BHSI also coordinates the Community Action Network (CAN), which is a community coalition that focuses on reducing the inequities in infant mortality and poor birth outcomes through policy strategies. The purpose of this project is to improve health outcomes before, during, and after pregnancy, and to reduce racial/ethnic differences in rates of infant death and adverse perinatal outcomes!

BHSI serves self-Identified Black women/persons, pregnant or postpartum, and parenting up to 18 months receiving services at affiliated health centers or through Healthy Baby Healthy Child. We also provide services to fathers/male partners with the intent to support and uplift whole families.

HSA therhood Summit d Annual Conference

Celebrating NHSA's 25-Year Legacy Grounded in Equity, Engaging & Lifting Community Voice March 26-30, 2023

Program Highlights

Support affiliated health centers by funding a community health worker (CHW) "family partner" to assist families with accessing resources, care coordination, advocacy, and health education.

- Increased sites funding for client support material budget. Allowing sites the ability to purchase items such as diapers, wipes, clothing, etc.
- Increased participant compensation) from \$50 to \$75. We believe community led initiatives & people should be paid for their time.
- Partnered with Little Cocoa Bean Inc. to provide baby nutrition, education and resources.
- Partnered with March of Dimes to host implicit bias training for providers in maternal health.
- Recognize wellness and self-care as necessary component of the work. implement wellness activities and conversations in every staff meeting.
- Improved data collection processes that reduce burden on families and staff.
- Expanding Father specific Healthy Start in Housing slots/units

Program Highlights

Community Action Network

- Uplift the CAN Tuesdays
- Large Quarterly CAN Meetings
 - Policy Priorities:
 - Local Fetal Infant Mortality Review
 - Preconception Health: Community-Driven Opportunities to Improve Preconception Health in Boston (Report)

Perinatal Behavioral Health

- Individual therapy
- Virtual Support Drop in's
- Support Group (4th Trimester: Black Women in Motherhood)
- Presented our work at CityMATCH in 2022

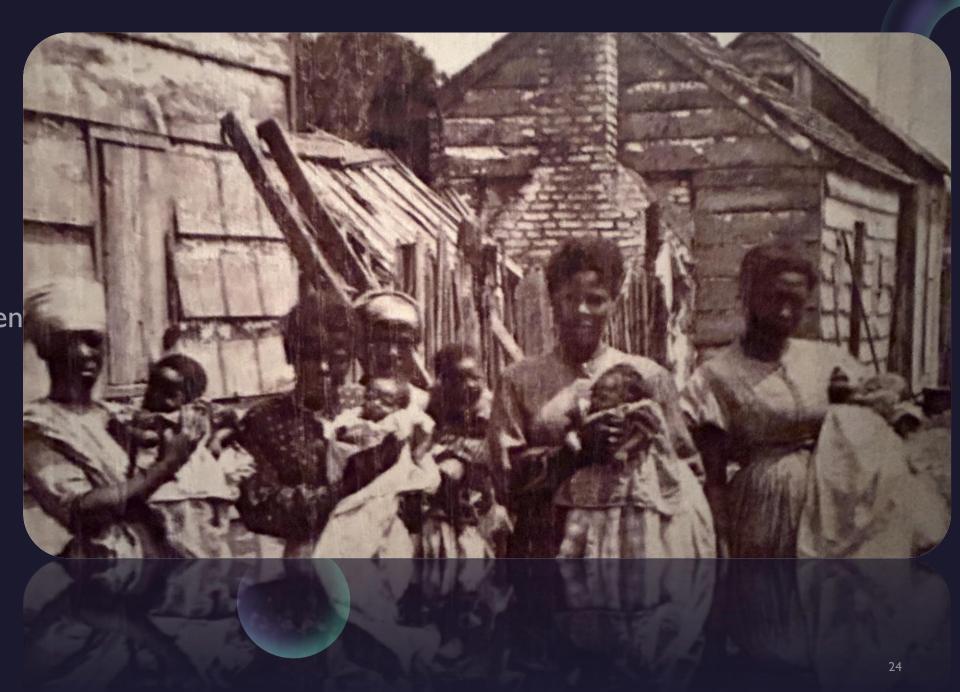

For babies to be born healthy and stay healthy, mothers and families need to have access to quality health care and physical, social, and economic environments that promote health throughout their lifetimes.

Thank You!

Current and Future Work

MCHB MISSION

To improve the health and well-being of America's mothers, children, and families.

MCHB VISION

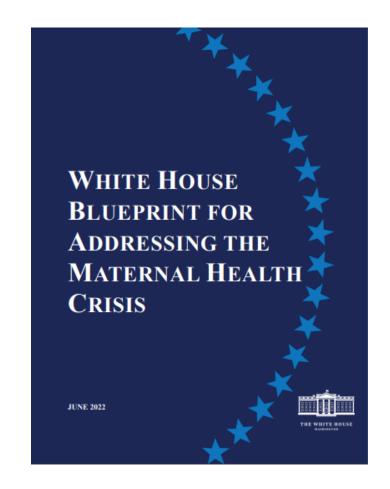

An America where all mothers, children, and families are thriving and reach their full potential.

Assure access to high-quality and equitable health services to optimize health and well-being for all MCH populations.

GOAL 2 Achieve health equity for MCH populations.

GOAL 3 Strengthen public health capacity and workforce for MCH.

GOAL 4 Maximize impact through leadership, partnership, and stewardship.

BRIEFING ROOM

FACT SHEET: President Biden's and Vice President Harris's Maternal Health Blueprint Delivers for Women, Mothers, and Families

JUNE 24, 2022 · STATEMENTS AND RELEASES

Today, the White House released the Biden-Harris Administration's <u>Blueprint</u> for Addressing the Maternal Health Crisis, a whole-of-government approach to combatting maternal mortality and morbidity. For far too many mothers, complications related to pregnancy, childbirth, and postpartum can lead to devastating health outcomes — including hundreds of deaths each year. This maternal health crisis is particularly devastating for Black women, Native women, and women in rural communities who all experience maternal mortality and morbidity at significantly higher rates than their white and urban counterparts.

Under President Biden and Vice President Harris's leadership, this

A description of the second selection of the second second

WHITE HOUSE BLUEPRINT FOR ADDRESSING THE MATERNAL HEALTH **CRISIS**

Maternal Health Actions Goal 4

Expand and Diversify the Perinatal Workforce

Our maternal health workforce is under-resourced and not representative of our country's diversity. Given the known benefits of culturally appropriate care, recruiting and training providers from diverse communities is paramount. To address the gaps in our perinatal workforce, we will increase the number of physicians, licensed midwives, doulas, and community health workers in underserved communities.

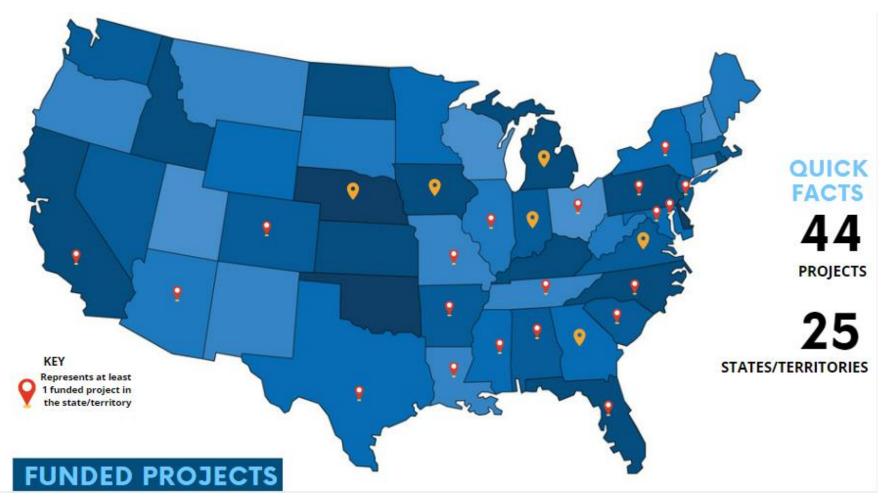

Community Based Doula Supplement

Community Based Doulas Supplement:

The purpose of this supplement is to increase the availability of doulas in Healthy Start service areas, which are those communities most affected by poor infant and maternal health outcomes

Doula Supplement: What We're Learning From the Field

NEEDS CU ASSESSMENTS RESPO

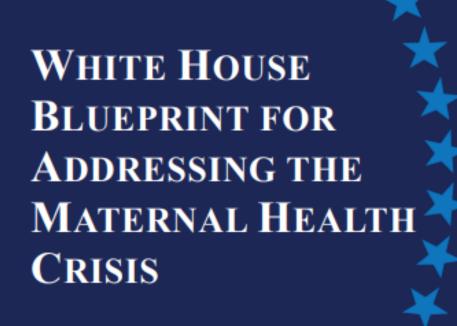

CULTURAL RESPONSIVENESS

COLLABORATION

INNOVATION

Maternal Health Actions Goal 5.2

Address the social determinants of maternal health.

Fund community-based organizations to support projects to expand maternal mental health access, develop community needs assessments in consultation with pregnant and postpartum individuals in local communities, increase access to effective digital tools to expand and enhance maternal health care, and expand models that train maternal health care providers and students on how to address implicit bias and racism and screen for social determinants of health.

National Maternal Mental Health Hotline

Catalyst for Infant Health Equity

Purpose

 To support the implementation of existing action plans that apply data-driven policy and innovative systems strategies to reduce IM disparities and prevent excess infant deaths.

Objectives

- Action Plan Implementation
- Strategic Partnerships
- Outcome Evaluation

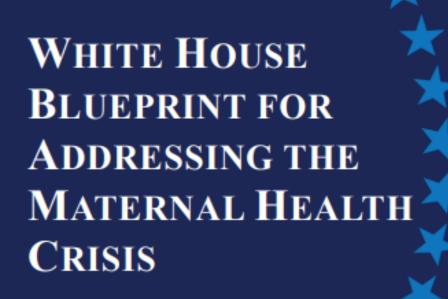

Goals

- To decrease and ultimately eliminate disparities in IM across racial/ethnic groups by achieving steeper declines for groups with the highest rates; and
- To continue reducing overall infant mortality (IM) rates in the United States.

Maternal Health Actions Goal 5.1

Strengthen Economic and Social Supports for People Before, During, and After Pregnancy

Streamline enrollment in benefit programs for housing, child care, financial assistance, and food by building better linkages between these programs so that pregnant and postpartum women can more easily obtain services that address their needs outside the doctor's office

Benefits Bundle Pilot

The Benefits Bundle project represents a joint effort between HRSA/MCHB and the Office of Management and Budget (OMB)/United States Digital Service (USDS). Other partners include USDA, DOE, HUD, and ACF, all working to improve the experiences of low-income families navigating the years from birth to age five (0-5).

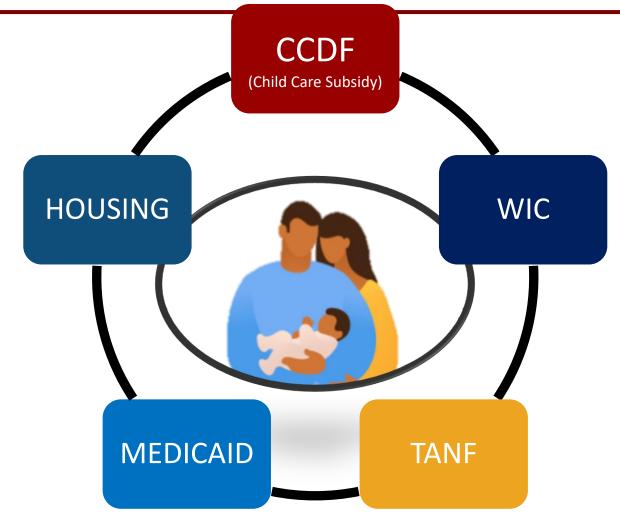

Benefits Bundle Pilot

What is the goal of the Benefits Bundle Pilot?

The goal of the Benefits Bundle Pilot is to support Healthy Start (HS) grantees in adopting and implementing peer-, communityand/or workforce-based models to improve family experiences in benefits navigation and beyond.

WHITE HOUSE BLUEPRINT FOR ADDRESSING THE MATERNAL HEALTH CRISIS

Maternal Health Actions Goal 1.7

 Improve quality of care provided to pregnant and postpartum women with or at risk for hypertensive disorders of pregnancy by disseminating self-measured blood pressure monitoring tools and resources for obstetrical providers, primary care professionals, and the pregnant and postpartum women they serve.

Blood Pressure Cuff Kit Pilot Project

Purpose

To ascertain the value of providing Blood Pressure Cuff Kits to Healthy Start communities.

Cuff Kit Pilot Project

Objectives:

- To **measure** the value of having a BP cuff in the house to support the HS participant in monitoring their BP.
- To support the HS participant in tracking and sharing BP readings with care providers.
- To **determine** how having a BP cuff in the home may result to broader utilization (e.g., partners, parents).

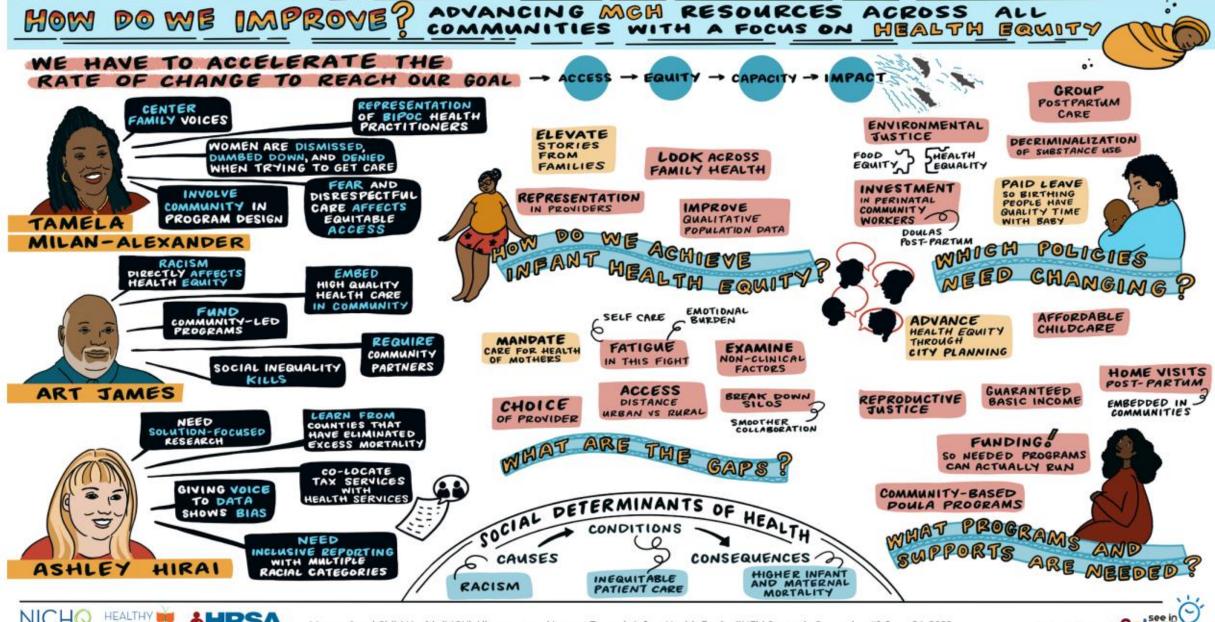

Lessons Learned: Infant Health Equity Convenings

How Do We Improve? Advancing MCH resources across all communities with a focus on health equity

- What Barriers Do We Face? Investing resources, improving community health and addressing inequities created by systemic and structural racism
- What Is the Data Telling Us? Engaging communities in data collection efforts to drive advancements in equity and measure progress.

What Did We Learn? What Actions Can We Take? Final convening for all MCH community members

Action Steps for Strengthening the MCH Workforce

Create a pipeline from the community to MCH careers to ensure the workforce is representative of service area

Create systems of support for MCH staff

Ensure pay equity for the MCH workforce

Action Steps for Addressing Upstream Drivers of Inequity

Prioritize and amplify mothers, fathers, and communities' lived experiences

Break down silos and expand programmatic reach beyond clinical settings

Expand efforts to address non-clinical needs, including economic/occupation segregation, housing instability, food insecurity, transportation

Action Steps for Revising Funding Practices

Bolster support for community-based, community-driven organizations

Strengthen relationships between the community and funding institutions

Create systems of accountability

Action Steps for Enhancing Data Collection and Utilization

Invest in resources to expand the current understanding of maternal and infant health outcomes

Rethink what kind of data to collect

Strengthen utilization of data

Strengthen community engagement in data collection

Lessons Learned: Grantee Listening Sessions

Addressing Social and Structural Determinants of Health

Increasing Grantee Flexibility

Reducing Grantee Burden

Grantee Listening Sessions – Increasing Grantee Flexibility

Community Level
Flexibility to address the main drivers of infant mortality within the project area and target population

Participant Level

Flexibility to customize the types and intensity of services

Grantee Listening Session – Addressing SSDOH

Increased emphasis on upstream interventions

Increased emphasis on addressing SSDOH for Healthy Start participants

Increased emphasis around activities that address racism and bias

Grantee Listening Sessions- Reducing Grantee Burden

Consider strategies to support Healthy Start staff retention

Consider requirements for number served - quality over quantity

Reduce data collection and reporting burden

Clarify program requirements (e.g., clinical funding, CAN activities)

Healthy Start Request for Information – Initial Takeaways

Recommendations for HRSA:

- Increase the emphasis on addressing SSDOH impacting Healthy Start communities:
 - Need for multiple strategies (e.g., educating providers, housing, transportation, public/private partnerships, mental health, CANs).
- Support Healthy Start programs to address racism and bias in health care through education and training, family engagement and developing crosssector partnerships.
- Consider the needs of rural and border communities in Healthy Start program design.
- Recognition of the value in a single Healthy Start data base and the challenges switching to a new database may pose for some grantees.
 - Recommendations on improvements to CAREWare.

Continued Priorities – Addressing the Key Drivers of Infant Mortality

Leading Causes of Infant Mortality

Infant deaths and mortality rates for the top 5 leading causes of death for African Americans, 2020
(Rates per 100,000 live births)

Cause of Death (By rank)	# Non- Hispanic Black Deaths	Non-Hispanic Black Death Rate	# Non- Hispanic White Deaths	Non-Hispanic White Death Rate	Non-Hispanic Black / Non- Hispanic White
					Ratio
(1) Low birthweight	1,136	214.4	1,040	56.4	3.8
(2) Congenital malformations	705	133.1	1, 976	107.2	1.2
(3) Sudden infant death syndrome (SIDS)	472	89.1	563	30.5	2.9
(4) Accidents (unintentional injuries)	375	70.8	547	29.7	2.3
(5) Maternal Complications	337	63.6	370	20.1	3.2

Massachusetts Title V Presentation

Elaine Fitzgerald Lewis, DrPH, MIA

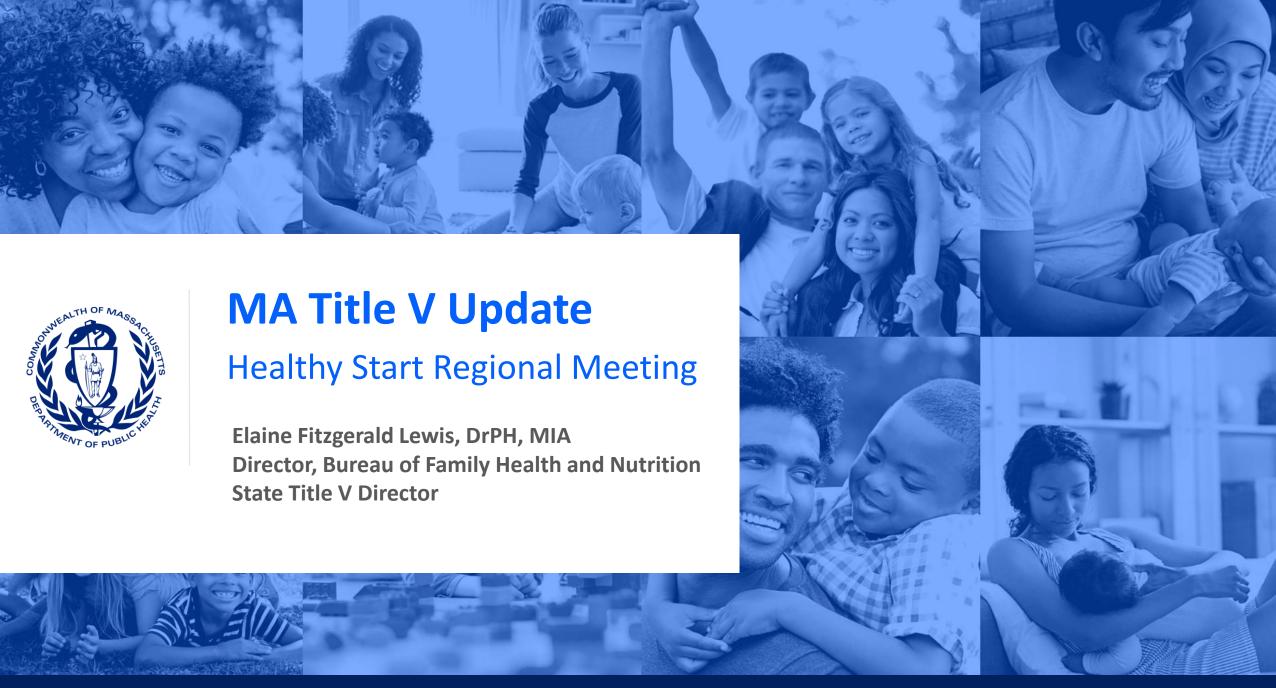

Director

Bureau of Family Health & Nutrition Massachusetts Department of Public Health

Overview

- Highlight MA Title V 2020 2025 Top 10 Priorities
- Crosswalk MCH population domains, priorities, and performance measures (State and National)
- Evidence-Based Strategy Measures (ESM)
- Opportunities for Collaboration

Massachusetts Title V Priorities for 2020-2025

1. Racial equity

Eliminate institutional and structural racism in DPH programs, policies, and practices to improve maternal and child health.

4. Substance use prevention

Prevent the use of substances, including alcohol, tobacco, marijuana, and opioids, among youth and pregnant people.

2. Healing-centered systems

Support equitable, healing-centered systems and approaches to mitigate the effects of trauma, including racial, historical, structural, community, family, and childhood trauma.

5. Mental health & emotional well-being

Strengthen the capacity of the health system to promote mental health and emotional well-being.

3. Social determinants of health

Eliminate health inequities caused by unjust social, economic, and environmental systems, policies, and practices.

Massachusetts Title V Priorities for 2020-2025 (cont.)

6. Nutrition & physical activityFoster healthy nutrition and physical activity through equitable system and policy improvements.

9. Health transitionSupport effective health-related transition to adulthood for adolescents with special health needs.

7. Sexual & reproductive health
Promote equitable access to sexuality
education and sexual and reproductive
health services.

engagement
Engage families, fathers, and youth with diverse life experiences through shared power and leadership to improve maternal, child, and family health

services.

10. Father, youth & family

8. Maternal morbidity & mortality
Reduce rates of and eliminate inequities
in maternal morbidity and mortality.

Title V Domains, Priorities & Performance Measures

Domain	Priority	Performance Measure
Maternal/	Maternal Morbidity and Mortality	SPM1: % of cases reviewed by MMMRC within 2 yrs of death
Women	Substance Use Prevention	NPM14: % of women who smoke during pregnancy
	Mental Health and Emotional Well-being	See Child domain
Perinatal/Infant	Nutrition & Physical Activity	NPM4: % of infants ever breastfed and % breastfed exclusively through 6 mos
Child	Mental Health and Emotional Well-being	NPM6: % children (9-35 mos) who received a developmental screen in past year
	Nutrition & Physical Activity	See Perinatal/Infant domain
Adolescent	Sexual & Reproductive Health	SPM2: Rate of teen birth among LatinX adolescents NPM10: % adolescents (12-17 yrs) with preventive medical visit in past year
	Substance Use Prevention	See Maternal/Women domain
	Mental Health and Emotional Well-being	See Child domain

Note: SPM – State Performance Measures; NPM – National Performance Measures

Title V Domains, Priorities & Performance Measures

Domain	Priority	Performance Measure
CYSHCN	Health Transition	NPM12: % of adolescents (12-17 yrs) who received services necessary to transition to adult health care
	Mental Health and Emotional Well-being	See Child domain
Cross-cutting	Racial Equity	SPM3: % of Bureau staff who have used any racial equity tool or resource in their work
	Family, Father & Youth Engagement	SPM4: % of Title V programs that offer compensated family engagement and leadership opportunities; using FESAT Family Voices assessment
	Social Determinants of Health	SPM5: % of families who have had difficulty since their child was born covering basics, like food or housing, on their income
	Healing & Trauma	SPM6: % of staff that report a workplace culture that reflects a safe and supportive environment to mitigate primary and secondary trauma

Note: SPM – State Performance Measures; NPM – National Performance Measures

Process for Identifying Evidence-Based Strategy Measures (ESMs)

Title V Priority Implementation Teams identified ESMs that:

- ✓ Monitor effect of evidence-based or informed strategies aimed at achieving progress on NPMs
- ✓ State specific
- ✓ Actionable

NPM	ESM
NPM1. Breastfeeding	% of WIC participants receiving services from a Breastfeeding Peer Counselor who exclusively breastfed for at least 3 mos
NPM6: Developmental screening	% of infants and children enrolled in WIC who are monitored using Learn the Signs Act Early checklist
NPM10: Adolescent preventive medical visit	% of School Based Health Center clients who are male
NPM14. Smoking during pregnancy	% of women using the statewide smoking Quitline who are pregnant

Collaboration Opportunities
