Black Birthing Bill of Rights

At NAABB we believe that all Black women and persons are entitled to equitable, comprehensive, and quality pre- and postpartum care in order to achieve their full birthing potential and thrive during the childbearing years. The Black Birthing Bill of Rights serves as a resource for individuals to become knowledgeable of their rights as a Black person in need of maternal care. It also serves as guidance to engage hospitals, health providers, government health agencies and others to change/improve their ethic, policies, and delivery approach to serving Black women and persons throughout the birthing process.

I have the right to be listened to and heard.

I have the right to have my humanity recognized and acknowledged.

I have the right to be respected and to receive respectful care.

I have the right to be believed and acknowledged that my experiences are valid.

Practice

Share a story of when you needed to advocate for yourself? What happened? How did you feel?

What would you change?

What did you learn?

One person listens only the other person talks for 3 minutes then we switch . (The person listening can not asked questions or make comments)

Let's talk about it...
