Community Partner Profiles Improve collaboration and alignment to address community health issues

January 11, 2024

Learning Objectives

- Describe the role of partner organizations in improving community health
- Explain how to use the Community Partner Profile tool to align partners' work
- Identify organizations addressing the SDoH related to a priority area of your work

Agenda

- Partnerships to improve community health
- Strategic alignment of partners
- Community Partner Profiles overview
- Breakout activity with the Profile
- Debrief

What are the benefits of working with partners?

Resources:

- Skills and expertise
- Funding
- Staff time

Community Connection:

- Relationships with community
- Knowledge of community needs

What are some examples of health priorities you have worked on that are impacted by multiple social determinants of health?

What are some examples of **partner organizations** you have worked with to address those issues?

The Challenge with Misalignment

When you have...

High-level goals

Unspecific objectives

Partner organizations doing their usual work

Meaningless measures (number of meetings, number of handouts disseminated

...you get...

Everyone working toward the same goal, but no one working together.

The Beauty of Alignment

When you have...

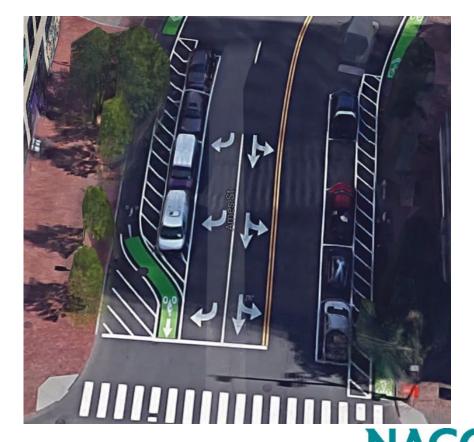

Measurable goals

SMART objectives

Partner organizations tailoring their work to the objectives

Meaningful measures of progress

...you get...

Why measure process and outcomes?

Process Measures

Measures program <u>activities</u> that lead to outcomes.

Number of client visits, number of patient calls

Are we implementing our program as planned?

Outcome Measures

Measures <u>results</u> of programs that have been implemented.

Quality, health outcomes, cost effectiveness

Are we achieving our goals?

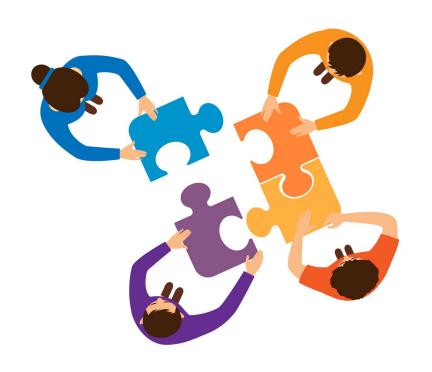

Community Partner Profile Tool

A set of steps to guide organizations across sectors to address community-wide challenges.

Used when **starting** new work with partner organizations.

Step I: Describe status of health priority

What do we know about this issue?

- Data about the issue
- Experiences of community members
- Existing inequities
- Community strengths

Step 2: What is the context?

What social determinants of health are related to this issue?

- Identify SDoH related to issue
- Identify partner organizations
 who work with those SDoH

Step 3: Complete Community Partner Profile

Identify overlap of partners' work and the priority issue.

- Partners describe current programs relevant to the issue, including:
 - Goals & Objectives
 - Outcome Metrics
 - Process Metrics

CHIP Priority: List the Community/Healthy People Indicators most relevant to your organization's mission:			
Describe the current programs, services, or interventions	Associated Goals and Objectives	Outcome Metrics	Process Metrics

How have other partner organizations contributed to making progress on that issue?

Step 4: Shared Methods and Measures

Outline how each partner is contributing to the goal.

For each goal, identify:

- Strategies to make progress
- Key actions of each partner to contribute to strategies
- Process metrics of actions to measure implementation

Priority Issue Goal

Strategy

SMART Objectives

Partner's work

Example of Shared Methods and Measures

Priority Issue: Access to healthy food among families with income below 200% of the Federal Poverty Line.

Goal: All residents have access to fresh fruits and vegetables within I mile of their home.

Strategies: Establish two new bi-weekly farmers markets in county.

Partner A's Key Actions: Build relationships with local farm vendors. Process Metrics: Number of local farm vendors contacted to participate.

Activity: Identify Aligned Partners

- Refer to Page 4 of the Community Partner Profile tool
- Identify a common priority issue of your work
- Name the social determinants of health that relate to that issue
- Who in the community contributes to those SDoH?
- What are some examples of opportunities to collaborate with those partners?

Debrief

- What stands out to you from this tool and activity?
- How could you use this tool in your work?
